

The Camp Long Declaration

WHEREAS, Life Cycle Assessment is an effective methodology specifically designed to measure the environmental performance of goods and services in a transparent, holistic, science-based manner; and

WHEREAS, Life Cycle Assessment is increasingly used by companies, government agencies and others to inform their decision making;

WHEREAS, a high-quality inventory of common industrial processes is essential to drive consistency of life cycle studies; and

WHEREAS, the U.S. Life Cycle Inventory Database is intended to provide public, high quality, transparent, industry average life cycle inventory data,

NOW, THEREFORE, we, the undersigned agree to work together to:

- Develop a quality management system for the U.S. Life Cycle Inventory Database;
- Collaborate with international efforts to facilitate data transfer among Life Cycle Inventory databases;
- Develop systems to assure the ongoing sustainability of the U.S. Life Cycle Inventory Database; and
- Communicate these efforts to all interested parties.
