Life Cycle Assessment IX

Toward the Global Life Cycle Economy

Boston September 29 to October 2nd 2009

This year, CIRAIG (the Canadian LCA Research Centre), CADIS and ITAM (Mexican LCA centers) and SETAC North America join with the **American Center for Life Cycle Assessment** to produce the first joint co-located LCA conference for all of North America. With the current disruption in world markets, never has it been more important to understand the sustainability implication of our decisions, and to use the best available science for planning for the global life cycle economy.

Nearly 300 presentations in oral and poster format will cover the full range of LCA issues. Workshops on Land Use and Biofuels and on Uncertainty in LCA will be included, as well as special sessions on

- Operationalizing LCA in Industry
- Coordinating Life Cycle inventories in the US, Canada and Mexico
- Dynamic and temporal modeling in LCA
- International Standardization for carbon footprinting
- Assessing Water Use in LCA
- Land Use in LCA
- International Capability Development
- Land Use in LCA
- Social LCA
