

Faculty Position – Energy and Resource Productivity Bren School, UC Santa Barbara

The Bren School of Environmental Science and Management (www.bren.ucsb.edu) invites applications for a faculty position in Energy and Resource Productivity. The level of appointment is open; appointments at the Professor or Associate Professor level carry tenure in the University of California system.

The Bren School is a graduate school providing rigorous, multi-disciplinary training in environmental science and management to Masters and Ph.D. students. The faculty is drawn from the natural sciences, engineering, social sciences, and management. The School is expanding its research and teaching in the broad context of climate and energy policies and efficient resource management.

The successful candidate will have a research focus in energy and resource productivity—preferably with a background in engineering, systems design, or relevant natural sciences—and familiarity with interdisciplinary approaches. The research can include the analysis of energy or resource use in the production, distribution, storage, and delivery of goods and services, and technologies and strategies for increasing output per unit of energy or resource input. The Bren School is interested in researchers who examine these issues and their implications for improving energy and resource productivity and environmental quality.

Publications in leading peer-reviewed journals, demonstrated mentorship of graduate students and superb teaching, an active research program and a national and international reputation commensurate with appointment as a Professor at the University of California are essential. The incumbent is expected to establish and maintain ties with UCSB's School of Engineering and other relevant departments.

Send applications to: Energy and Resource Productivity Search Committee, Bren School of Environmental Science and Management, University of California, Santa Barbara, CA 93106-5131; e-mail resource@bren.ucsb.edu fax (805) 893-7612. Electronic submission of the application as a single package is highly desirable and must include a curriculum vitae, a statement of research interests and teaching experience, and copies of up to five publications. Upon request three names should be supplied for letters of reference to the search committee. For fullest consideration, all materials should be received by January 31, 2009, although the position will remain open until filled.

The University of California is an Equal Opportunity/Affirmative Action Employer. We encourage all qualified applicants to apply, including minorities, women, and persons with disabilities. The School is especially interested in candidates who will contribute to the diversity and excellence of the academic community through research, teaching and service.
